ABOUT ME

A Full-Stack Engineer with 3 years of experience in developing enterprise web applications at DXC Technology. I have led small teams to implement new features, such as multilingual support, and to update the front-end versions while also assisting in the selection of appropriate tools to solve technical problems. My expertise includes developing scalable backends and creating dynamic and reusable front-end components. I possess advanced skills in various programming languages and tools, along with team management and problem-solving abilities.

WORK EXPERIENCE

Business Applications Engineer

DXC Technology

2021 - Present (3 years)

- Led small teams to develop new features, such as multilingual support
- Successfully updated the entire front-end stack to the latest technologies.
- Contributed to defining task time estimates and played a key role in selecting appropriate technologies and libraries.
- Collaborated closely with designers and analysts to translate business requirements into robust technical solutions.
- Developed and maintained scalable back-end features with Java Spring Boot and dynamic, reusable front-end components with Angular, enhancing the user experience.
- Provided support and guidance to new team members, helping them adapt and integrate effectively into the team.
